Inc GST*

14 Days Turnaround
(if no variations required)

"Can you come to site and prepare plans for approval?"

RESIDENTIAL, RURAL AND ENVIRONMENTAL ZONING PLAN PACKAGE

Terms and Conditions.

Terms, Conditions and Disclaimers:

Drafting and Turnaround Times:

- Turnaround times detailed are based on number of days from site assessment to submission to approving authority.
- Turnaround times are dependent on the relevant information being provided by You and do not include changes requested by You, Council Representatives, Builders, kit sellers or Your PCA.
- Turnaround times will extend if Variations requests are required by you.
- Max size – The maximum size building covered under the above price list is 450m². Buildings over this size are to be quoted separately by Fernleigh (Fee estimate = Commercial/Industrial Buildings over 350m² are estimated at \$11/m²).
- The times detailed are for plans to be returned to you based on information provided by You and do not include changes requested by You, Council Representatives, Builders, kit sellers or Your PCA.
- Turnaround times may extend in higher volume periods such as Steel price rises, EOFY and Christmas etc.
- Turnaround times may also be delayed due to closures, lockdowns and events out of Fernleigh's control.
- Printing and postage – Printing and postage fees apply for plan packs. All files can be provided via email and taken to be printed on A3 by You on request. All documents can be placed on a USB. Additional fees apply.

Approval and Variation:

- Whilst we seek to get every application approved with council, there is no guarantee that council will accept and approve the application. As such the purchasing of a shed, prior to approval is a risk you bear.
- Whilst variations to the council DCP can be approved (although not guaranteed), these come with additional work both in the planning and the submission/council stage. As such, jobs that require one or more variations to council DCP items such as maximum size, height, cut and fill or setbacks, have additional costs associated with them as detailed in the order form/price list.
- Building within protected areas will also likely receive pushback from council, as such there is additional work and time required in these plans and submissions. Bushfire, Flood, Water Catchment, Riparian Water, Mine Subsidence will likely require additional work with council to finalise
- Jobs with one or more variations, will likely take longer in the drafting, submission and approval stages as opposed to a proposal completely compliant with council DCP guidelines.

External professional services that may be required:

- Deposit Plan & Planning certificate costs – 'Deposit plans' detail your property boundaries and enable us to locate and position your proposed development on your site. A Deposit Plan is normally provided in your deed when you purchase a property. If you cannot provide a Deposit Plan, a fee of \$60.5 (Inc GST) is applicable to obtain these documents through an information broker. Planning certificates (also known as Section 10.7 certificates) and 88b Instruments are also normally provided from your conveyancer when buying a property. Additional fees may apply if council or the certifier requests these.
- Bushfire assessments – May be required if you are planning to erect an outbuilding, deck or pergola within 10m of a dwelling in a fire zone. Fernleigh can arrange a quote for you from an external professional should this be required.
- Mine Subsidence Approval - This will be required if your property is within a Mine Subsidence District. The costs of this approval/stamping are detailed in the price list.
- Water Authority Approval – Approval/Stamping may be required from a water authority to ensure the proposed build is not affecting existing assets. The costs of this approval/stamping are detailed in the price list.
- Site Survey – Council or certifier may request a site survey providing ground levels to Australian Height Datum (AHD) or FINAL SURVEY to confirm location of 'as built' structure. This service is to be conducted by a registered Surveyor. Fernleigh can organise this for you.
- Outdoor kitchen detailing/ Wet area detailing – Outdoor Kitchen and wet area detailing charged \$110 +GST (Example = External powder room or Laundry <=10m²). This will involve changing plans to Class 1a Habitable.
- Sewer Peg outs – If you are proposing to build OVER or ADJACENT to a sewer service; a 'Sewer peg out' may be requested. Sewer peg outs are conducted by registered inspectors and charges are made directly to you via your chosen inspector. Sewer peg out information can be added to your development application plans after the peg out is conducted. Give us a call for more information.

Costs not covered by Fernleigh:

- Fernleigh **does not** pay council or certifier fees associated with council applications.
- Council may request additional information in the form of external professional reports such as; Additional drafting, Detailed Survey Reports, Bushfire Reports, Arborist Reports, Flood Certificates. Whilst we can assist in engaging the relevant professional, Fernleigh does not cover the cost of the report itself.
- Additionally, plan stamping may be required by the relevant water, property or mine authority. Whilst we venture to have these approvals/stamping undertaken prior to the submission to council, these can be requested by council even where it does not appear to be required. In either event, the submission of plans for stamping may create additional delay in the process which is out of Fernleigh's control.

Documents required from you throughout process:

- Your signature on council forms for submission.
- Engineering from manufacturer of shed, awning, etc.
- Any correspondence from council directly to yourself following submission.

Minimum fee

- A minimum site call out fee of \$185 (+GST) applies if the job is cancelled after the site measure is conducted or cancelled due to information being provided on site by a representative of Fernleigh.
